# INSTITUTIONAL PROGRAM INFORMATION

Following each of the profile pages for the community colleges, four-year publics, two- and four-year privates, and the special schools, there is program information listed. The programs are separated by degree level, and then alphabetized within the degree level. Also included is information on Classification of Instructional Programs (CIP) code, Teacher Certification (TCH CERT), and Credit Hours (CREDIT).

Please see the CIP Code Directory section in the back of this book for more information on CIP codes. The TCH CERT column specifies whether the program offers a teacher certificate upon completion of the program. The CREDIT column specifies how many credits it takes to complete the program.

## **The Integrated Postsecondary Education Data System (IPEDS) definition for the award/degree levels are as follows:**

Level 1	Postsecondary award, certificate, or diploma of less than one academic year (less than 900 contact or clock hours)
Level 2	Postsecondary award, certificate or diploma of at least one but less than two academic years (at least 900 but less than 1800 contact or clock hours)
Level 3	Associate's degree
Level 4	Postsecondary award, certificate, or diploma of at least two but less than four academic years (at least 1800 contact or clock hours)
Level 5	Bachelor's degree
Level 6	Post-baccalaureate certificate
Level 7	Master's degree
Level 8	Post-master's certificate
Level 17	Doctor's degree-research/scholarship
Level 18	Doctor's degree-professional practice
Level 19	Doctor's degree-Other

An all-inclusive list of programs for all schools listed in this handbook is located in the CIP Code Directory section. This list is grouped by CIP code and includes degree level and the name of the school that offers the program.

# COMMUNITY COLLEGES

## INTRODUCTION

The community colleges in Michigan are individually profiled in this section. Requirements, deadline dates, phone numbers, cost estimates, and housing information are all provided. The various programs under which courses are offered are listed in the following chapter.

The community college provides a wide range of programs in order to meet the ever-increasing needs of the local community for educational opportunities beyond the high school level. Community colleges in Michigan offer only course work leading to less than a baccalaureate degree. The programs offered tend to fall into the following categories:

**Liberal Arts and Professional Programs** – Pre-professional training designed to provide transfer credit to four-year institutions. Dentistry, education, law, medicine, etc., are just a few of the program areas.

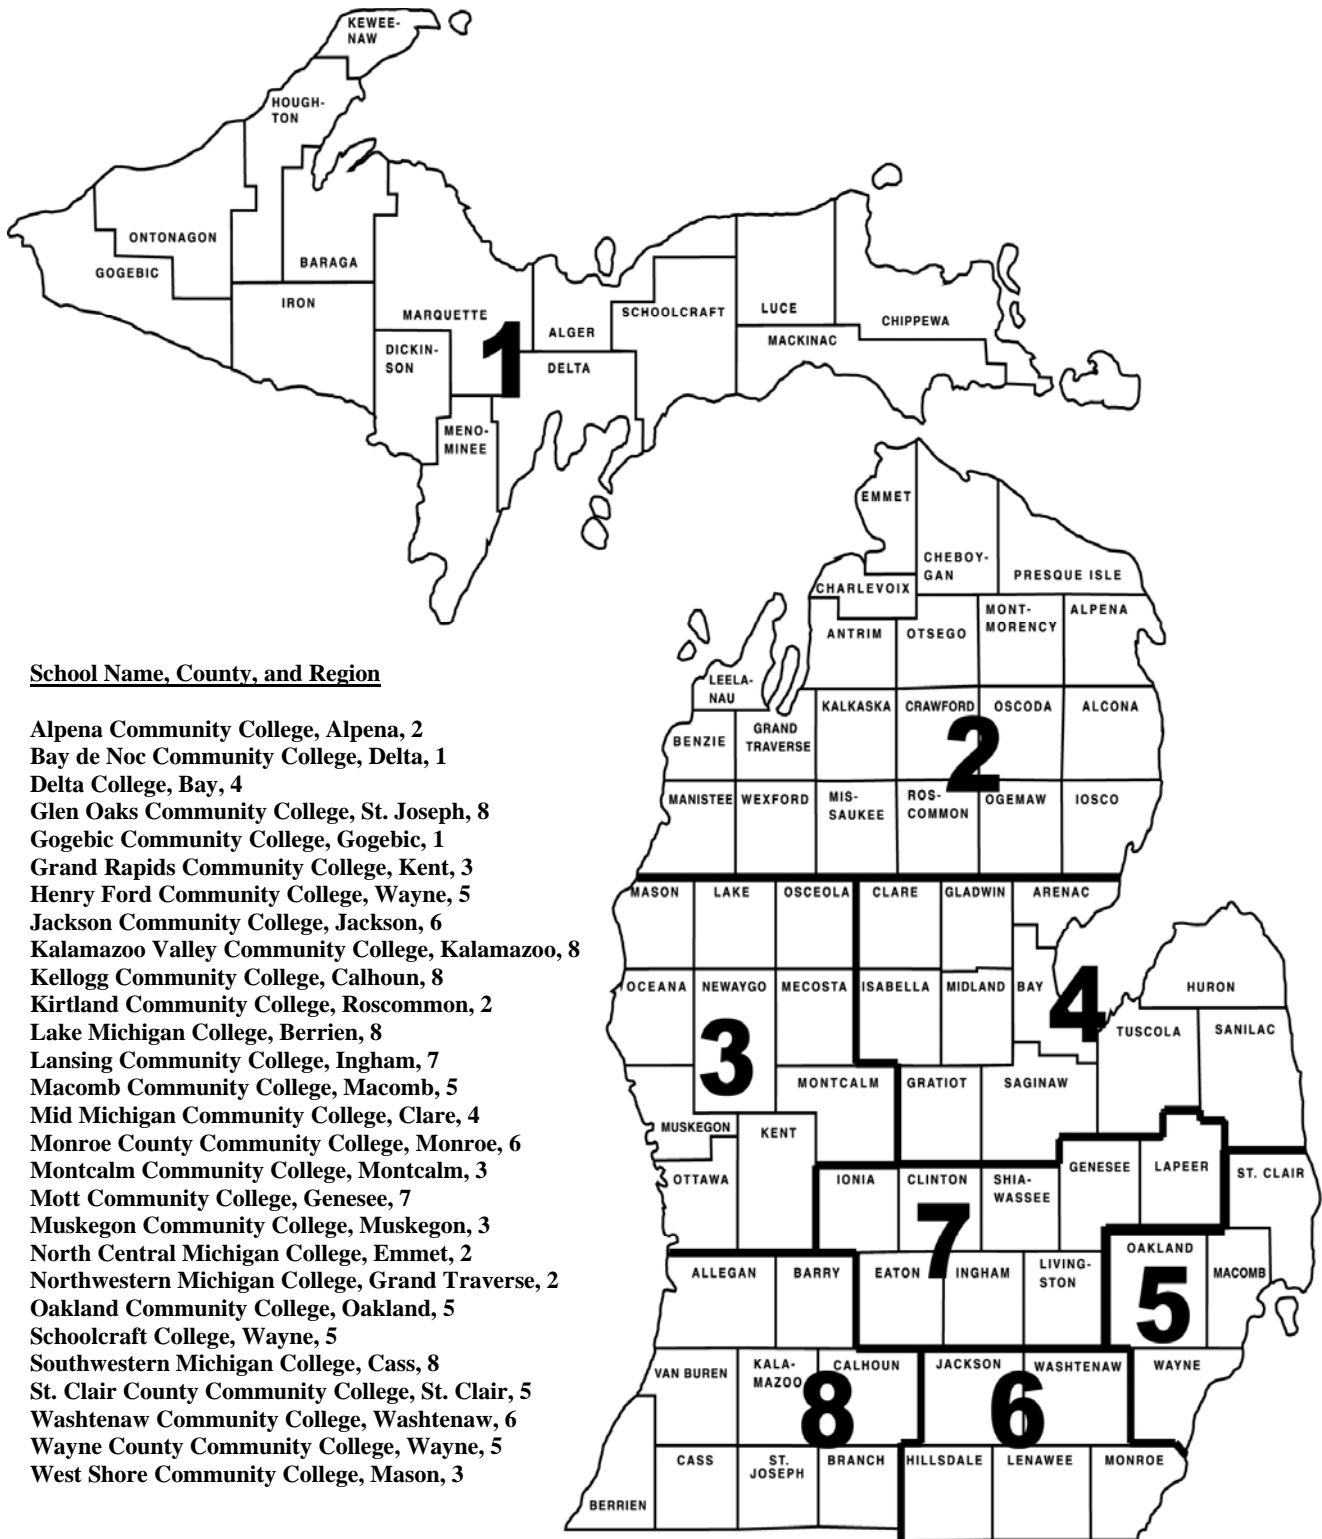

**Vocational-Technical Programs** – Occupations in the fields of business, public service, technology, etc. An associate degree or certificate is awarded upon completion of a program. Some transfer credits may apply to specific colleges.

**Apprenticeship Instruction Programs** – Designed to meet the needs of local industry for related trade instruction. These programs are primarily available to students who are already employed in the sponsoring industry.

In most cases, information is also provided pertaining to the number of semester/term hours required to complete the program and whether a teaching certificate is available in conjunction with it.

Comments

Effective Spring/Summer 2011, HFCC has combined it's Spring and Summer academic terms into a single fin aid award period. The 2012-2013 FAFSA covers Fall 2012, Winter 2013, and Spring/Summer 2013 at HFCC. An institutional financial aid request form must be completed to be considered for Spring/Summer 2013 financial aid.

Students can choose to compete for numerous institutional scholarships. Applications are separate from the FAFSA and are available at the College's Enrollment Services Office located in the Gannon Building. The costing above assumes 3 semesters, required registration fees, and 30 billable hours. Other student expense data were provided by the College's Office of Financial Aid. Race and ethnicity data are from student self-reporting.

To get in-district tuition: reside in WCC district prior to 1st day of semester if previous residency was in MI, or reside in the WCC district now & in MI for 6 mo immediately prior to 1st day of semester if previous residency was outside of MI. WCC has 4 tuition rates: In-District, Out-District, Out-State/Out-Country & Distance Learning. To get correct rate, make sure residency status is correct before semester begins. Financial aid applicants should file taxes early.

# **PROFILES**

## **4-YEAR PUBLIC UNIVERSITIES**

# **PUBLIC FOUR-YEAR UNIVERSITIES**

## **INTRODUCTION**

Michigan's 16 public four-year institutions are individually profiled in this section. Requirements, deadline dates, phone numbers, cost estimates and housing information are all provided. The various programs under which courses are offered are also listed.

Program offerings at these comprehensive institutions can be divided as follows:

**Certificate and Associate Degree Programs** – Several of the universities provide less than baccalaureate degree programs for various occupations. These programs are found under the level 1 through 3 headings.

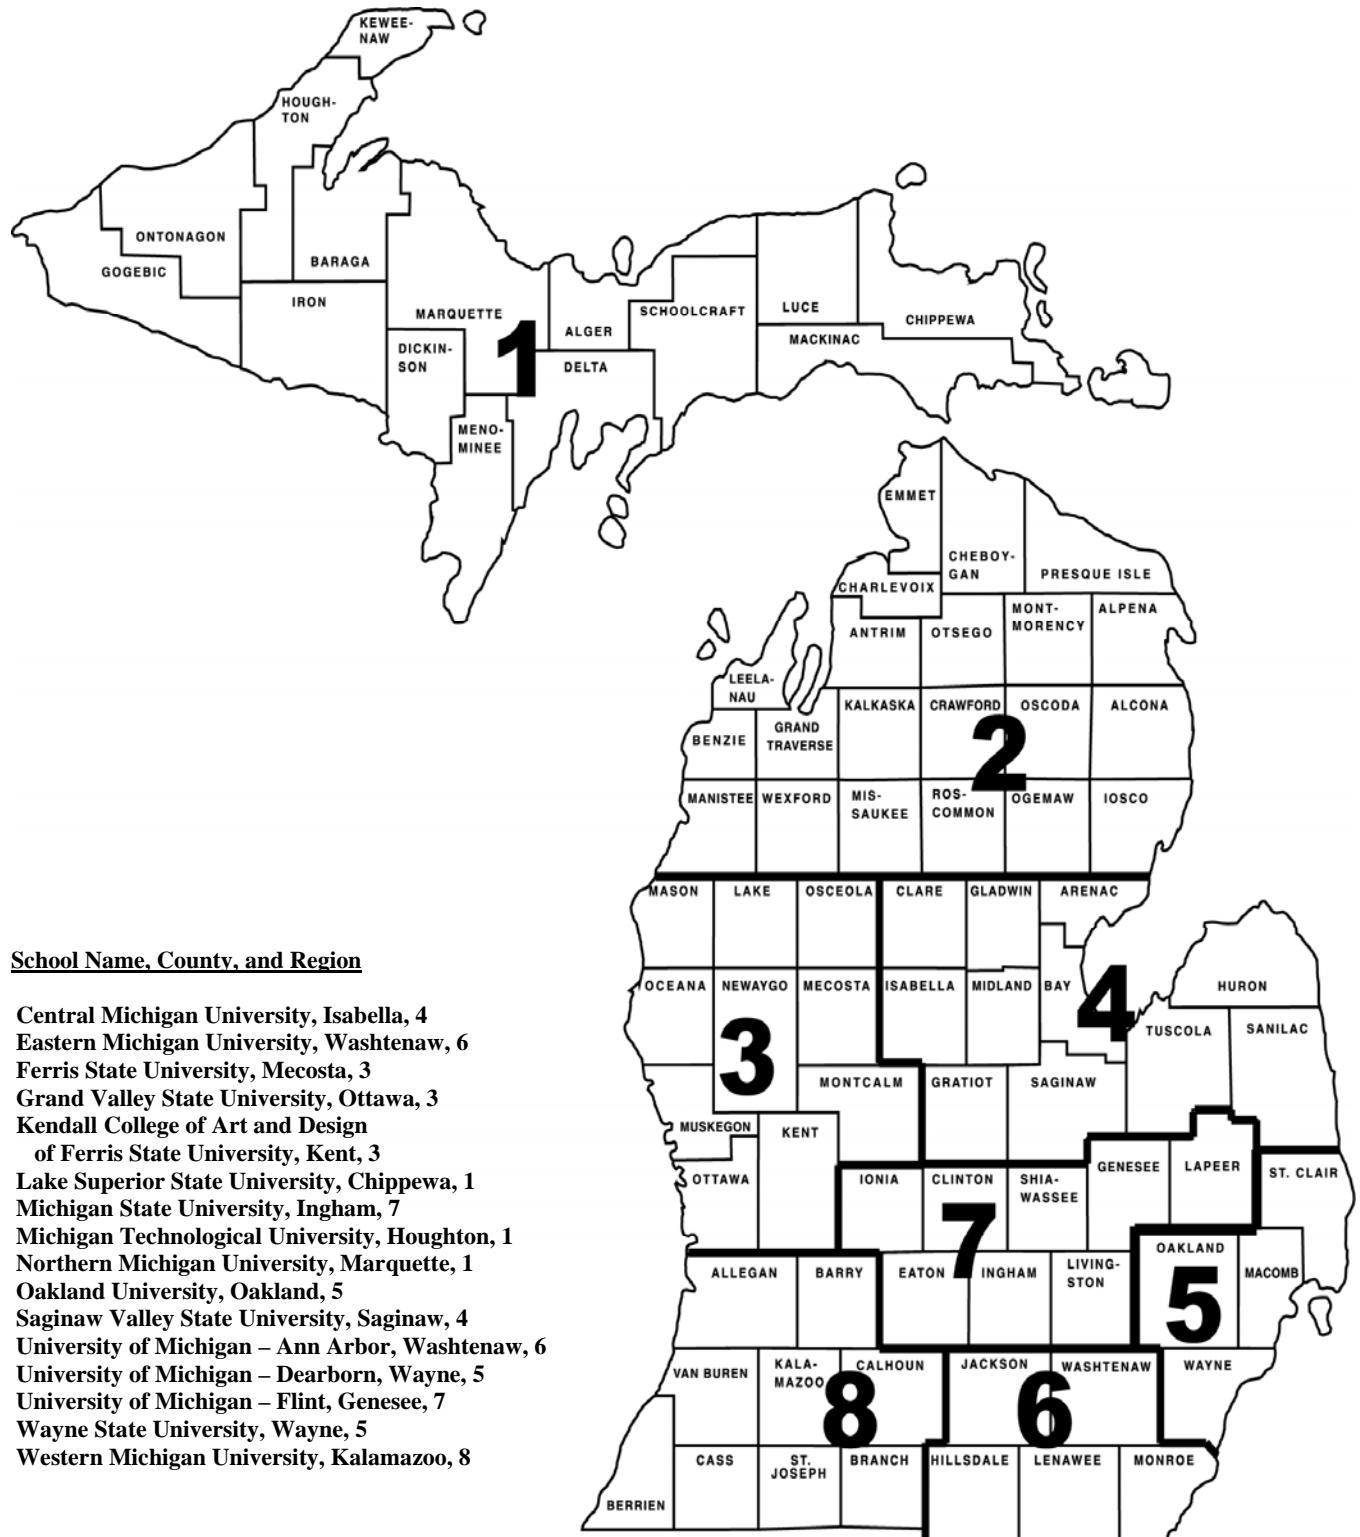

**Undergraduate Baccalaureate Programs** – This division includes all programs through which a baccalaureate degree can be earned (level 4 programs).

**Graduate-Professional Programs** – These programs lead to post-baccalaureate degrees in the various professional disciplines (level 5 through 9 programs).

In most cases, information is also provided pertaining to the number of semester/term hours required to complete the program and whether a teaching certificate is available in conjunction with it.

Please see the CIP Code Directory for an explanation of the program arrangement sequence.

# **PROFILES**

# **INDEPENDENT UNIVERSITIES**

# **TWO- AND FOUR-YEAR COLLEGES AND UNIVERSITIES INTRODUCTION**

There are many independent two- and four-year institutions in Michigan. Several of the schools have branch campuses, which increases the total number of separate sites across the state. These institutions offer a wide variety of educational programs. Programs offered at these institutions can be divided as follows:

**Certificate and Associate Degree Programs** – Several of the colleges and universities provide less than baccalaureate degree programs for various occupations. These programs are found under the level 1 through 3 programs.

**Church-Affiliated Terminal Programs** – Are found under level 1 programs.

**Undergraduate Baccalaureate Programs** – This division includes all programs through which a baccalaureate degree can be earned (level 4 programs).

**Graduate-Professional Programs** – These programs lead to post-baccalaureate degrees in the various professional disciplines (levels 5 through 9 programs).

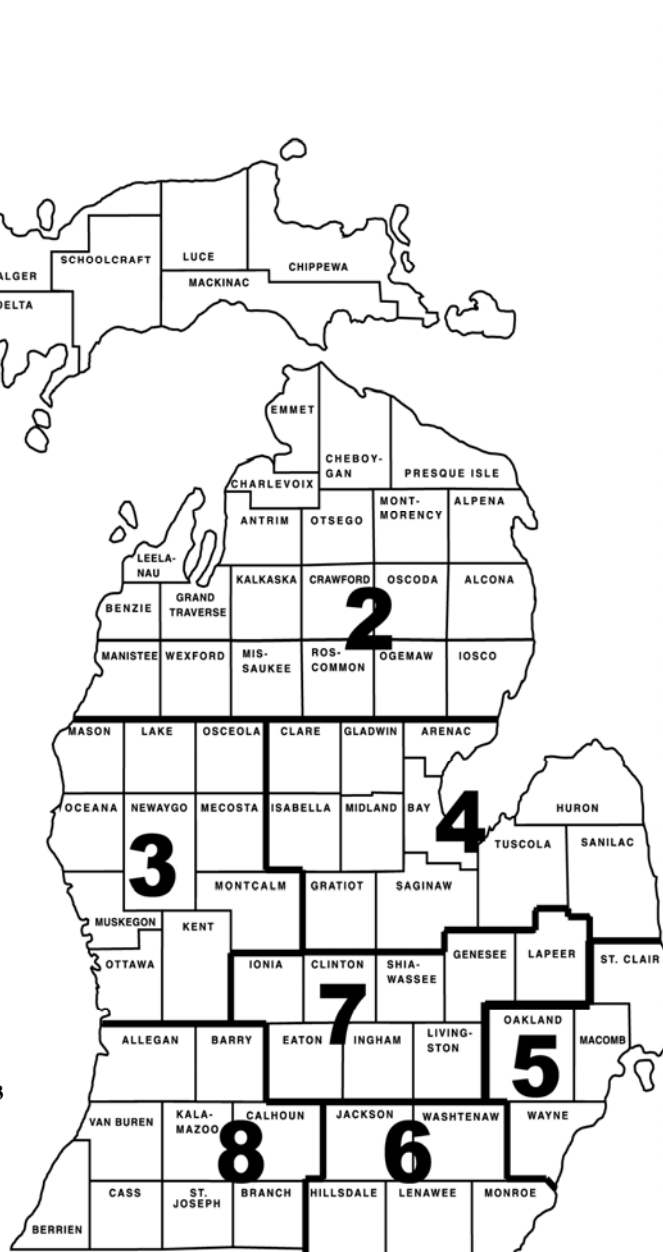

In most cases, information is provided pertaining to the number of semester/term hours required to complete the program and whether a teaching certificate is available in conjunction with it.

Please see the CIP Code Directory section of this book for an explanation of program arrangement sequence.

## **SPECIAL CATEGORY SCHOOLS**

# **SPECIAL CATEGORY SCHOOLS INTRODUCTION**

## **TRIBALLY CONTROLLED SCHOOLS**

Tribal Colleges were created over the last 30 years in response to the higher education needs of American Indians, and generally serve geographically isolated populations that have no other means of accessing education beyond the high school level. These colleges have become increasingly essential to educational opportunity for American Indian students, a status they have achieved in a relatively short period of time. Tribal Colleges are unique institutions that combine personal attention with cultural relevance, in such a way as to encourage American Indians—especially those living on reservations—to overcome the barriers in higher education.

## **MICHIGAN CAREER AND TECHNICAL INSTITUTE**

The Michigan Career and Technical Institute (MCTI) conducts vocational and technical training programs and provides the supportive services needed to prepare Michigan citizens with disabilities for competitive employment.

As a leader in the rehabilitation community, MCTI and its staff have the right and responsibility to promote the integration of persons with disabilities into both the competitive workplace and the society in which they live. Empowerment enables one to learn and take responsibility for one's own choices and have a sense of control over the outcomes of one's life.

# INTRODUCTION

## MICHIGAN CAREER AND TECHNICAL INSTITUTE

The Michigan Career and Technical Institution (MCTI), a program within the Michigan Department of Licensing and Regulatory Affairs (LARA) and Michigan Rehabilitation Services, conducts vocational and technical training programs. MCTI also provides the supportive services needed to prepare Michigan citizens with disabilities for competitive employment.

A separate entity from the traditional community college or technical school, MCTI has provided training for adults with disabilities in Michigan since 1944. MCTI offers a unique blend of caring support services and state-of-the-art job training for business and industry today. MCTI operates under the auspices of the LARA. It is one of only eight comprehensive rehabilitation training centers in the United States.

The campus — located on the shores of Pine Lake in southwestern Barry County—is fully accessible. For eligible adults who have a physical or mental disability, tuition and room and board in the dormitory are free. A career assessment service is available to help students explore career options. A full spectrum of health, psychological, and social work services is also provided. All classrooms, dormitory rooms, cafeteria, library and leisure services are located in one building for easy accessibility out of the weather.

**At a reasonable cost, a two- and three-bedroom housing complex and day care center are available on campus for students with children. Depending on aptitude and interest, students may choose to enroll in one of several technical training programs. Each training area has an active Business Advisory Committee comprised of employers in that field. Their participation assures students that the curriculum and equipment meet business and industry standards. MCTI is accredited by the North Central Association – Commission on Accreditation and School Improvement (NCA-CASI) and by the Commission on Accreditation of Rehabilitation Facilities (CARF).**

# **PROGRAMS OF MICHIGAN CAREER and TECHNICAL INSTITUTION**

## **Automotive Technology**

Along with established academic and hands-on training, MCTI's Automotive Technology program operates like a small repair and auto parts business. All students are trained in basic shop practices and have hands-on experience working on vehicles.

Students may train in the diagnosis and repair of brakes, suspensions, and electrical, heating/air conditioning, and engine performance systems, working toward state of Michigan and national (ASE) certifications. The program is based on the National Automotive Technicians Education Foundation (NATEF) competency standards.

Students may also focus on the customer service side of the auto parts business. These students practice basic cataloging, inventory management and merchandizing skills. These students must complete a five (5) week work internship.

## **Cabinetmaking/Millwork**

MCTI's Cabinetmaking/Millwork Program is one of the best-equipped shops in the country for cabinetmaking and millwork training. Students are trained in the operation of state-of-the-art CNC panel processing equipment, spindle molders, profile grinders, and numerous other woodworking machines. Students work on individual as well as production projects.

## **Certified Nurse Assistant**

In the Certified Nurse Assistant (CNA) program, students learn to care for patients in a caring and compassionate manner. Students first learn patient care techniques in a simulated lab environment, followed by a clinical rotation at a nursing home. Upon completion of the program, students are offered study and practice sessions to prepare for the state of Michigan competency exam.

## **Culinary Arts**

MCTI's Culinary Arts Program operates the Pine Cove Restaurant on campus. Students gain experience in the restaurant setting and also work in the school cafeteria, where they learn large-quantity food preparation, breakfast cookery, and serving. The program offers the required classes for chef certification, ServSafe, nutrition and supervision. The program is accredited by the American Culinary Federation's Secondary Accrediting Committee.

## **Custodial**

MCTI's Custodial Program is designed to train individuals to be capable, well-qualified building and commercial custodians. Through the use of up-to-date equipment, students apply the skills learned at on-campus job stations. Through hands-on training, students gain experience in daily cleaning and floor maintenance, stripping of floors, restroom sanitation, daily carpet cleaning and shampooing, and using and maintaining equipment. Students are also trained to follow work schedules and keep inventory.

## **Customer Service**

In the Customer Service Program, students work in a simulated customer service environment utilizing a telephone and a computer to learn all aspects of customer service including problem solving, telephone techniques and etiquette, computer concepts, and business correspondence. This hands-on training insures the student can work effectively on the computer while communicating clearly, resolving problems, and remaining tactful when handling complaints and satisfying customers.

Advanced students may also qualify to work in one of the MCTI offices or other internship opportunities available. Students within this department may take any courses listed with instructor approval.

## **Electronics**

MCTI's Electronics program has a well-equipped electronics lab that provides up-to-date, hands on training. Students in the Electronics program learn entry-level skills appropriate to most electronic businesses and industries. Courses help prepare students for entry-level employment in industrial/ electronics maintenance. More than 75 percent of the student's time is spent in the lab with hands-on training exercises.

## **Graphic Communications**

MCTI's Graphic Communications Program is run like a print shop. In this production environment, students develop job competencies, while operating specialized printing equipment to produce brochures, business cards, forms, and other printing for the school and various other organizations.

## **Grounds Maintenance and Landscaping**

MCTI's Grounds Maintenance and Landscaping Program is run like a small grounds maintenance and landscaping business. Students are the crew and work as a team. Students gain actual experience on the school campus. They use power equipment and tools to mow and trim the lawn; trim and prune hedges and bushes; and plant trees, shrubs, and flowers. In the winter months, they are exposed to snow and ice removal using plows and a variety of hand tools. The "crew" maintains the equipment used.

## **Machine Technology**

MCTI's Machine Technology Program runs like a small machine shop. Students are taught to run various machines including manual lathes, milling machines, and grinders. Students use hand tools to layout, finish, fit, and assemble parts. Students also learn setup and operation of CNC turning and machining centers. Advanced students learn to use CAD/CAM software such as AutoCAD, Solidworks, and Bobcad/CAM to generate G-code for CNC machining.

## **Office Automation**

MCTI's Office Automation Program has a well-equipped office automation lab that provides a realistic setting for up-to-date, hands-on training. Students spend approximately 30 hours a week maintaining and repairing office management systems, computers, copiers, printers, cash registers, fax machines, and other office equipment. Depending on interest and ability, students may also learn webpage design and basic computer programming.

## **Pharmacy Aide**

MCTI's Pharmacy Aide Program students acquire essential customer service skills needed to interact professionally with pharmacy customers, co-workers, and other healthcare professionals. Students practice using medical and pharmaceutical terminology and performing pharmacy related calculations. They also receive hands-on experience related to cashiering and inventory management in the on-campus store – the Eagle Shack. During the second term, students receive additional training (externship) at a pharmacy

## **Retail Marketing**

MCTI's Retail Marketing Program operates the Eagle Shack, the on-campus store. Students learn customer service/personal selling, cash handling, inventory control, merchandising, and promotion/advertising.

# **CAREER READINESS CENTER (CRC)**

MCTI provides evaluations and remediation services to give students the necessary supports to successfully complete their program. The Career Readiness Center is comprised of four programs: Career Assessment Services, the Education Center, the Reading Clinic and Step-Up.

The CRC programs work together to offer a variety of assessments, structured programs and classes to potential and current vocational trade students. The CRC prepares students to enter a vocational trade program that matches their skills and interests and builds employability skills prior to entering the vocational trade program and/or the world of work.

## **CAREER SCHOOLS LICENSED BY THE MICHIGAN DEPARTMENT OF LICENSING AND REGULATORY AFFAIRS (LARA)**

In addition to the degree-granting colleges and universities, which are authorized to operate in the State of Michigan, a wide range of private career schools are also available to Michigan students. Pursuant to Act 148, Public Acts of 1943, as amended, no person(s), firm, corporation, or private organization may conduct a private trade school, business school, or institute in Michigan without first obtaining a license from LARA. Private trade schools, often called proprietary schools, offer programs which train a person for a trade, occupation, or vocation.

It is not the policy of LARA to recommend or endorse any private trade school, business school or institute. The issuance of a license to a Michigan school simply indicates that the school has met the requirements of the law at the time the license was issued. Out-of-state schools can receive a certificate of compliance, which entitles them to employ solicitors who enroll Michigan residents. A complete listing of Michigan schools with active licenses and out-of-state schools with authorization to solicit students in Michigan is found on the LARA's Web site at [www.michiganps.net](http://www.michiganps.net).

**OCCUPATIONAL PROGRAMS  
LICENSED BY OTHER  
STATE AGENCIES**

# **OCCUPATIONAL PROGRAMS LICENSED BY OTHER STATE AGENCIES INTRODUCTION**

In addition to individual vocational schools that are licensed through the Michigan Department of Education, there are several other types of training programs that are licensed by other state agencies. Separate aeronautics, barber, cosmetology, and nursing commissions or boards have been established to certify programs in their respective fields. Commercial vehicle training programs are licensed through the Michigan Department of State. A complete listing of approved programs in these areas can be found in the following section of this handbook. Further information pertaining to these various programs can be obtained directly through the licensing agency involved.

- **Aeronautics (Flight) Schools**
- **Barber Schools**
- **Cosmetology Schools**
- **Nursing Education Programs**
- **Truck Driver Education Programs**

All school information provided in this handbook is subject to institutional review and revision.

# **BARBER SCHOOLS**

Michigan barber schools are licensed by the Department of Licensing and Regulatory Affairs, Bureau of Commercial Services, Board of Barber Examiners. Upon successful completion of the required 2,000 hours at a barber school, the student is eligible for the barber examination. The Student will be issued a barber license after passing the examination.

The Michigan Board of Barber Examiners will accept student hours out of state, and a licensed barber out of state may receive a Michigan license without examination, if their training and licensing were substantially equal to Michigan. Following is a list of the licensed barber schools in Michigan:

# **COSMETOLOGY SCHOOLS**

Cosmetology schools are licensed by the Michigan Board of Cosmetology. These schools offer courses of study related to beauty culture. The cosmetology curriculum entails a 1,500 hour course of instruction. Graduation from the program is a prerequisite for admission to the State Cosmetology Examination. Other programs have the following requirements:

**Cosmetology Instructor**

500 Hours of Instruction

**Manicuring**

**Esthetics**

**Electrology**

**Natural Hair Cultivation**

400 Hours of Instruction

**Electrology Instructor**

**Limited Specialist Manicuring Instructor**

**Limited Specialist Skin Care Instructor**

**Limited Specialist Natural Hair**

**Culturist Instructor**

300 Hours of Instruction

Students who graduate from a cosmetology school and successfully pass the examination may apply for a license to practice in Michigan.

Upon submission of an application to the department, an individual licensed to perform cosmetology services under the law of another state shall, without examination, be granted a license to practice the services for which that individual was previously licensed if the applicant meets the following requirements: a) is not less than 17 years of age, b) is of good moral character, and c) the requirements for registration or licensure in the particular state were substantially equal to the requirements then in force in this state. Applications are reviewed on an individual basis by the Michigan Board of Cosmetology before licensure to practice in Michigan is allowed. Such applicants not demonstrating the equivalency course work, may be required to take additional course work or take the State Cosmetology Examination before becoming licensed to practice in the State of Michigan.

**Further information concerning cosmetology programs, please contact:**

# AERONAUTICS (FLIGHT) SCHOOLS

Schools of aeronautics teach courses of study related to aviation. Due to licensing procedures and policies, schools offering programs related to aviation fall into two categories, as follows:

1. Degree-granting colleges and universities that offer Federal Aviation Administration (FAA) approved flight training (ground and flight schools) and/or related mechanical programs are licensed in the college section of this book.
2. Private or vocational schools offering FAA approved flight training (ground and flight schools) are licensed by the Michigan Department of Transportation, Office of Aeronautics, which is located at 2700 Port Lansing Rd, Lansing, Michigan 48906, 517.335.9719.

Flight Schools are either certified under Part 61 or Part 141, of the Federal Aviation Regulations (FARs). Each offer the same basic training and require the same FAA exams. The major difference is the training environment.

Training under Part 141 tends to be more structured and fewer flight hours are required. Under Part 141, a pilot certificate can be obtained in as little as 35 hours of flight time.

Under part 61, the minimum flight time requirement is 40 hours. This may be a moot point since the national average shows that it takes 60-75 hours of flight training to obtain the rating. For a Commercial Pilot Certificate, a Part 141 school only requires 190 hours of flight time rather than 250 hours under Part 61.

<u>Certificate or Rating</u>	<u>Minimum Flight Time Require</u>	<u>Approximate Cost</u>
Private Pilot	40 hours	\$5,000 to \$8,000
Commercial Pilot	250 hours	\$4,000 + (dependent on hours needed)
Instrument Rating	125 hours (including 40 hours instrument time)	\$5,000 to \$8,000
Flight Instructor	No minimum specified	\$3,500
Multi Engine Rating	No minimum specified	\$1,500
Helicopter Rating	40 hours	\$12,000

# **NURSING EDUCATION PROGRAMS**

Two different types of nursing programs are offered in Michigan, both of which render the graduate eligible for Registered Nurse (RN) licensure by the Board of Nursing. Bachelor of Science in Nursing (BSN) and Associate Degree in Nursing (ADN) programs are offered in conjunction with degree-granting schools. They offer a college degree in conjunction with preparation for RN licensure. Each college or university determines the transferability of hospital nursing school credits (diploma programs) into a degree program.

Practical Nurse programs are also offered at both degree and non-degree institutions. Practical Nurse programs offered at colleges and universities generally award credit toward a degree, as well as, prepare the student for Licensed Practical Nurse (LPN) licensure, while Practical Nurse programs offered at non-degree institutions also prepare the student for LPN licensure. The credits involved may or may not be accepted toward degree requirements by individual colleges or universities. Both types of programs award the graduate a certificate.

The Board of Nursing, Michigan Department of Licensing and Regulatory Affairs, Bureau of Health Professions, P.O. Box 30670, Lansing, Michigan 48909, 517-335-0918 has responsibility for approving all of the nursing programs outlined above.

Students successfully completing one of these approved programs must pass the National Council of State Boards of Nursing's examination (NCLEX) prior to actually receiving their RN or LPN license. Out-of-state graduates, wishing to practice in Michigan, must apply to the Board for licensure. The procedures involved for the licensing of out-of-state personnel vary with the individual's program of study experience.

A listing of Nursing and Nursing-related programs can also be found in the CIP Code section of the handbook under code 51.16. Further information concerning the various nursing education programs that are available can also be obtained through the Michigan League for Nursing, 2410 Woodlake Drive, Okemos, Michigan 48864, 517-347-8091, Fax 517-347-4096.

# TRUCK DRIVER EDUCATION PROGRAMS

Michigan law requires all driver education providers, including providers of truck driver education programs, be certified by the Secretary of State. A student enrolling in a truck driver education program must possess a valid Michigan operator or chauffeur license and obtain a commercial driver license (CDL) temporary instruction permit (TIP) to be eligible to receive behind-the-wheel instruction, and the CDL TIP is only available to persons 18 years of age or older. In addition, an acceptable driving record, as well as a favorable medical examination report, is required of commercial drivers. Vision, knowledge, and skills tests are required prior to issuance of a commercial driver license and endorsements. For further information concerning truck driver education providers in Michigan, call or write: **Michigan Department of State, Driver Programs Division, Richard H. Austin State Office Building, 3rd Floor, 430 W. Allegan, Lansing, Michigan 48918, phone 517-241-6850.**

Visit [www.Michigan.gov/teendriver](http://www.Michigan.gov/teendriver), click on the right tool bar heading entitled “Find a Driver Education Program”, then on “Driver Education Provider List” for an updated list of providers that offer truck driver education programs that are certified in accordance with 2006 PA 384.

# **CIP CODE DIRECTORY and PROGRAM CROSS REFERENCE INDEX**

**Classification of Instructional  
Programs (CIP)**

# **CLASSIFICATION OF INSTRUCTIONAL PROGRAMS INTRODUCTION**

The purpose of the Classification of Instructional Programs (CIP) is to provide a taxonomic scheme that will support the accurate tracking, assessment, and reporting of fields of study and program completions activity. CIP was originally developed by the U.S. Department of Education's National Center for Education Statistics (NCES) in 1980, with revisions occurring in 1985 and 1990. The 2000 edition of the CIP (CIP- 2000) is the third revision of the taxonomy and presents an updated taxonomy of instructional program classifications and descriptions. The CIP is the accepted federal government statistical standard on instructional program classifications and is used in a variety of education information surveys and databases. The CIP is also used by the National Academy of Sciences, state agencies, national associations, academic institutions, and employment counseling services as the basis for collecting, reporting, and analyzing instructional program data.

For more information on CIP Codes visit the U.S. Department of Education's National Center for Education Statistics (NCES) Web site at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2002165>.

**For the purpose of this handbook, the CIP codes are helpful because postsecondary institutions assign them to their programs. There are many different names for the same program, so it is helpful to categorize programs by CIP code. The Cross Reference Index (identified below) is a tool used to locate programs by CIP code and the postsecondary institutions that offer the programs.**

## **There are four sections to this chapter:**

### **1. CIP Categories**

- The two-digit codes and NCES-defined programs are located at the beginning of each program group; the program titles appear in capital letters (examples: 01. AGRICULTURE, AGRICULTURE OPERATIONS, AND RELATED SCIENCES)
- When looking for a program, the first thing to identify is the two-digit Series code.

### **2. Numeric listing by CIP code**

- Narrow the search for programs by using the Numeric listing.
- NCES program titles at this level appear with more detail (examples: 01.00 Agriculture, General; 01.01 Agricultural Business and Management, and 01.02 Agricultural Mechanization)
- Once the CIP code is identified, use the Cross Reference Index to find which postsecondary institutions offer the program. (See the next page for instructions.)

### **3. Alphabetical listing by program name**

- NCES programs listed alphabetically
- Search for the NCES-defined program name and identify the CIP code.
- Once the CIP code is identified, use the Cross Reference Index to find which postsecondary institutions offer the program. (See the next page for instructions.)

### **4. Cross Reference Index**

- A list of programs offered at Michigan postsecondary institutions sorted by CIP Code.
- Includes the institutions' program names, as well as the names of the institutions that offer the programs and the degree levels defined by the institutions.

# Using the Cross Reference Index

How can I find which colleges offer a certain program?

## Step 1 – Find the CIP Category

Find the two-digit CIP Code for the program of interest by referring to **CIP Categories**

([http://www.michigan.gov/documents/CIP\\_Categories\\_151809\\_7.pdf](http://www.michigan.gov/documents/CIP_Categories_151809_7.pdf)).

53.	High School/Secondary Diplomas and Certificates
54.	History (new)
55.	French/Canadian Language and Literature/Letters
60.	Residency Programs

## Step 2 – Refine the Search

To refine that search, refer to the **CIP Numerical** section

([http://www.michigan.gov/documents/CIP\\_Numerical\\_151810\\_7.pdf](http://www.michigan.gov/documents/CIP_Numerical_151810_7.pdf)),

or the **CIP Alpha** section

([http://www.michigan.gov/documents/CIP\\_Alpha\\_151808\\_7.pdf](http://www.michigan.gov/documents/CIP_Alpha_151808_7.pdf)).

# **ADVANCED PLACEMENT POLICIES FOR MICHIGAN COLLEGES AND UNIVERSITIES INTRODUCTION**

## **The Program**

The Advanced Placement Program® is a cooperative educational endeavor between secondary schools and colleges and universities. Since its inception in 1955, the Program has provided motivated high school students with the opportunity to take college-level courses in a high school setting. Students who participate in the Program not only gain college-level skills, but in many cases they also earn college credit while they are still in high school. AP courses are taught by dedicated and enthusiastic high school teachers who follow course guidelines developed and published by the College Board.

The Program's success is rooted in the collaborative efforts of motivated students, dedicated teachers, and committed schools. By participating in the Program, secondary schools make the commitment to organize and support at least one class that is equivalent to a first-year college course.

There are currently more than 110,000 teachers leading AP courses in high schools worldwide. AP teachers are some of the world's finest. The Program is strengthened by their participation in professional development workshops and Summer Institutes and in the annual AP Reading where thousands of AP teachers and college faculty gather at college sites across the United States to score the AP Exams using rigorous guidelines.

## **The Program's Role**

The AP Program plays a creative role as well as a facilitative one. As an intermediary among participating institutions, the Program does the following: Chooses college faculty and AP secondary school teachers who develop college-level Course Descriptions and examinations, and facilitates this development process; Administers and scores examinations based on the learning goals described in the Course Descriptions; Sends AP Grade Reports to the students, their schools, and their designated colleges; Prepares publications, online materials, and other resources to supplement and support the Program's activities; Provides conferences, consultants, and curricular materials to help interested schools establish college-level courses; Assists schools and teachers in their efforts to prepare students through professional development initiatives such as AP Vertical Teams®; Conducts research and strives to develop new services and products that enhance quality education.

## **AP Program Facts**

The AP Program offers 37 courses in 20 subject areas. Nearly 60 percent of U.S. high schools participate in the AP Program. In 2007, 2.1 million AP Exams were administered nationwide. More than 60,000 teachers nationwide attended AP workshops and institutes for professional development last year. Over 90 percent of the nation's colleges and universities have an AP policy granting incoming students credit, placement, or both, for qualifying AP Exam grades.

# ADVANCED PLACEMENT POLICIES

(Continued)

Effective April 8, 1996, Public Acts 160 (HB 4643) created the Postsecondary Enrollment Options Act (PSEO), providing for the participation of high school students in dual enrollment or postsecondary enrollment options. The bill is tie-barred to Public Acts 159 and 161, which, in part, direct the State Board of Education to publish a college level equivalent/Advanced Placement course directory.

Specifically, Public Act 159 (HB4640) states:

Sec. 1474.(1) The state board annually shall publish and distribute to school districts and public school academies, and upon request to non public high schools, a college level equivalent course directory. Subject to subsection (2), the college level equivalent course directory shall list postsecondary institutions in the state that grant college level equivalent credit and, for each of those postsecondary institutions, shall describe the institution's, college level equivalent credit policy and detail the specific courses and number of credits for which college level equivalent credit may be granted and the college level equivalent credit examination that must be completed and the score that must be achieved to qualify for college level equivalent credit for each of the courses.

(2) The state board shall not include information about a particular postsecondary institution in the college level equivalent course directory unless the chief academic officer of the institution, or his or her designee, review the information before publication and verifies in writing that it is accurate.

This section contains listings of awards of advanced placement credit for postsecondary institutions in Michigan. Credit is awarded for successful completion of any College Board advanced placement examination. Credits are awarded after official examination results are received and the student is enrolled in the institution. The number of credits granted for a particular advanced placement examination may vary from one institution to another and may depend on the score earned on the examination.

This publication reflects the most current institutional policies regarding Advanced Placement. All Michigan Colleges and universities were provided the opportunity to report on their Advanced Placement policies. For some institutions, this request was not applicable, and thus they are not included in this directory. While every effort has been made to present the most current information, it is always good practice to contact the institution with any questions that may arise upon review of the Advanced Placement policies contained in this section. # **DUAL ENROLLMENT FOR MICHIGAN COLLEGES AND UNIVERSITIES INTRODUCTION**

Recent legislation has amended the Postsecondary Enrollment Options Act (Public Act 160 of 1996) and the Career and Technical Preparation Act (Public Act 258 of 2000) to expand dual enrollment options for high school students in the State of Michigan. The language allows students to begin taking dual enrollment classes in 9th grade and to take up to 10 dual enrollment classes in grades 9-12. It also allows students at approved nonpublic schools to participate in dual enrollment.

These Acts allow high school students the opportunity to earn college credit in both academic and career and technical education programs. Payment for such enrollment is made from a school district's state aid foundation grant. The Acts establish eligibility criteria for students (including 5<sup>th</sup> year high school students) institutions, and courses; require eligible charges (tuition, mandatory course or material fees, and registration fees) to be billed to a school district; establishes enrollment and credit requirements; requires school districts to provide counseling and information to eligible students and their parents; and requires intermediate school districts to report these dual enrollments to the Michigan Department of Education. For more information on this legislation please contact Brian Barber by phone at 517.241.6895, by email at [barberb2@michigan.gov](mailto:barberb2@michigan.gov) or by visiting the Michigan Department of Education Website at [www.michigan.gov/dualenrollment](http://www.michigan.gov/dualenrollment).

## SAT vs ACT: How do they compare?

	SAT	ACT <i>NOTE: The ACT is the test that <u>must</u> be taken to qualify for the Michigan Competitive Scholarship Program.</i>
When is it administered?	October — June (offered on 7 Saturdays): Junior and/or beginning of Senior Year	September— June (offered on 6 Saturdays): Junior and/or beginning of Senior Year
What subjects are covered?	<p><b>Critical Reading, 70 minutes</b> Includes sentence completion and passage-based reading</p> <p><b>Math, 70 minutes</b> Includes basic algebra, geometry and statistics.</p> <p><b>Writing 60 minutes</b> Includes improving sentences/paragraphs, identifying sentence errors and an essay.</p>	<p><b>English, 45 minutes</b> Includes punctuation, grammar, sentence structure, strategy, organization and style</p> <p><b>Math, 60 minutes</b> Includes math up to an 11th grade level</p> <p><b>Reading, 35 minutes</b> Includes reading comprehension</p> <p><b>Science, 35 minutes</b> Includes analysis and problem-solving related to the natural sciences</p> <p><b>Writing, option; 30 minutes</b> Includes an essay</p>
What is the test format?	Multiple choice, except for writing section	Multiple choice, except for writing test
Is there a penalty for wrong answers?	Yes	No
How is the test scored?	Students can earn 200-800 points on each of the three sections; maximum 2,400 points.	Students can earn between 1 and 36 points on each of the four main sections; scores are averaged; maximum 36 points; writing test is scored separately.
Are all scores sent to schools?	If a student requests a score report be sent to specific colleges, the report will include the scores the student received on every SAT taken.	A complete report that's processed within one week after your request is received. ACT delivers these to colleges and agencies you've selected depending on their preferred schedule—at least every two weeks.
What is the best time to register?	At least six weeks before the test date.	<b>The first ACT test will be administered during the Michigan Merit Exam at no cost to the student.</b> The student is responsible for the cost of each test taken after that. Register at least four weeks before the test date.

## College Goal Sunday 2013 February 10th from 2 to 4 p.m.

**You could lose out on thousands of dollars for college.**

Don't let that happen. If you are graduating from high school in 2013 or if you're already in college, you need to submit the Free Application for Federal Student Aid (FAFSA). To get the most financial aid for college, your application needs to be turned in by March 1.

Make sure you do it right. Come to College Goal Sunday to have an expert help you fill out the FAFSA — FREE!

Not sure about college? Apply for the money now and decide later. If you wait, chances are you'll get less.

## Academic Eligibility Frequently Asked Questions

### ***When should a student register with the NCAA Eligibility Center?***

Students should register with the NCAA Eligibility Center at the beginning of their junior year in high school. At the end of the student's junior year, a transcript, including six semesters of grades, should be sent to the NCAA Eligibility Center from the high school. Additionally, students should have their SAT or ACT scores forwarded directly to the NCAA Eligibility Center (by using code "9999") whenever they take the exam.

### ***What is the fee to register?***

The registration fee is \$70 for U.S., U.S. Territories and Canadian students (U.S. Territories include American Samoa, Guam, Northern Mariana Islands, Puerto Rico and U.S. Virgin Islands); and \$120 for all other international students.

### ***Is this fee refundable?***

All fees are nonrefundable after successful registration. No refunds will be given due to nonparticipation or disinterest at an NCAA Division I or II college or university. In the event a duplicate registration was completed and duplicate payment was processed, you may be eligible for a refund of the duplicate registration fee(s). A completed refund request form must be sent to the NCAA Eligibility Center for consideration. You can find the form by going to [www.eligibilitycenter.org](http://www.eligibilitycenter.org), clicking the link to enter for "NCAA College-Bound Student-Athletes." You will then click "Resources" at the top of the page and then "Forms."

### ***What requirements do I need to be able to practice, play and get a scholarship at an NCAA Division I or II college or university?***

You need to complete the following:

1. Graduate from high school;
2. Complete a minimum of 16 (*Note: there will be new academic requirements for students enrolling on or after August 1, 2016, for NCAA Division I*) or 14 (*for students enrolling on or after August 1, 2013, for NCAA Division II*) core courses;
3. Present the required grade-point average (GPA) (for complete details, see the [Initial Eligibility Quick Reference Guide](#) for Division I or a minimum 2.0 GPA for Division II);
4. Present a qualifying test score on either the ACT or SAT (for complete details, see the [Initial Eligibility Quick Reference Guide](#)); and
5. Request final amateurism certification (beginning April 1 for fall enrollees or beginning October 1 for spring enrollees).

***How do I know if the courses I am taking will count as core courses?***

You need to look at your high school's List of NCAA Courses. Follow these steps:

1. Go to the NCAA Eligibility Center website at [www.eligibilitycenter.org](http://www.eligibilitycenter.org);
2. Click on the "NCAA College-Bound Student-Athletes" link to enter;
3. Click on "Resources";
4. Click on "U.S. Students";
5. Click on "List of NCAA Courses";
6. Input your high school's CEEB code (if you know it) or search by your high school's name and state; and
7. Review the list.

**\*Very important:** If a core course you took is not on the list, it will not be used in your eligibility determination. Courses that appear on your transcript must exactly match what is on the list.

***What do I do if a core course I took is not on the list?***

See your high school counselor immediately. Someone at your high school is responsible for keeping your high school's list updated. It is important your high school does this each year to make sure the core courses you are taking appear on the list.

***What is the lowest grade that will be used for a course to count as a core course?***

Follow your high school's policy regarding its lowest passing grade. If the NCAA Eligibility Center does not have this policy, the lowest passing grade that will be used is D.

***Will credit-by-exam courses meet core-course requirements?***

No. Courses completed through credit-by-exam will not be used.

***Are vocational courses acceptable?***

No. Traditional vocational courses (e.g., typing, auto mechanics, driver's education and health) are not acceptable.

***Do pass/fail grades count?***

Maybe, these grades may satisfy your core-course requirements. The NCAA Eligibility Center will assign your high school's lowest passing grade for a pass/fail class so long as the course receives credit toward graduation.

***May courses taken in the eighth grade that are high school core courses (e.g., Algebra I, Spanish 1, Freshman Composition) be used to meet the core-course requirement?***

A high school course taken in the eighth grade may be used if the course is on the high school transcript with a grade and credit and if the course is on the high school's List of NCAA Courses.

***May independent-study, Internet and correspondence courses count as core courses?***

Yes, if the following four conditions are met (beginning August 1, 2010):

1. Courses that are taught through distance learning, online, credit recovery, etc. need to be comparable in length, content and rigor to courses taught in a traditional classroom setting. Students may not skip lessons or test out of modules. The course must be four-year college preparatory.
2. All courses must include ongoing access between the instructor and student, as well as regular interaction for purposes of teaching, evaluating and providing assistance. This may include, for example, exchanging of e-mails between the student and teacher, feedback on assignments, and the opportunity for the teacher to engage the student in individual instruction. Any course taken must have a defined time period for completion. For example, it should be clear whether the course is meant to be taken for an entire semester or during a more condensed time frame, such as six weeks, etc.
3. Nontraditional courses should be clearly identified as such on the high school transcript.

Nontraditional courses completed prior to August 1, 2010, will be reviewed under NCAA standards in place prior to August 1, 2010.

It is important to remember that all courses need to be rigorous and four-year college preparatory in nature. Students should be encouraged to take courses that are quantitatively and qualitatively the same as courses offered through traditional means, and to take courses that will prepare them for the academic rigors they will face at a four-year college or university.

To read more about this new rule, go to [www.eligibilitycenter.org](http://www.eligibilitycenter.org) and click the "High School Administrators Enter Here" link, then the "Resources" page and read the documents related to online/virtual/credit recovery courses.

***May college courses count as core courses?***

College courses may be used to satisfy core-curriculum requirements if the courses are accepted and awarded credit by the high school for any student and meet all other requirements for core courses. For NCAA Division I only, such courses must be placed on the student's high school transcript. Courses taken at a college will NOT appear on the high school's list of NCAA courses. The high school's List of NCAA Courses will include only those courses taught/offered by the high school.

***How are courses taken over two years counted?***

A one-year course that is spread over a longer period of time is considered one course and will receive a maximum of one core-course credit. (Example: Algebra 1, spread over two years, would receive one unit of credit.)

***May my study in a foreign country help me meet core-course requirements?***

If you attended a secondary school outside the United States for all or part of grades nine through 12, different evaluation procedures will be applied to your international education documents. You must submit original-language documents with certified translations for NCAA Eligibility Center evaluation.

***How is my core-course GPA calculated?***

Your core-course GPA is the average of your best grades achieved for all required core courses. If you have taken extra core courses, those courses will be used in your GPA, only if they improve your GPA.

***Can weighted grades for honors or advanced-placement courses be factored into the calculation of the student's core GPA?***

A school's normal practice of weighting honors or advanced courses may be used, as long as the weighting is used for computing GPAs. Weighting cannot be used if the high school weights grades for the purpose of determining class rank. Additionally, in no instance may the student receive greater than 1.000 additional quality point for purposes of calculating the GPA for initial eligibility.

***How is the NCAA core GPA different from a student's overall GPA?***

The NCAA core-course GPA is calculated using only NCAA-approved core courses in the required number of core units. High school GPAs generally include the grades from most or all courses attempted in grades nine through 12.

***Will courses taken after my senior year meet core-course requirements?***

**For Division I, maybe.** Only courses completed in grades nine through 12 will qualify as core courses for Division I. If you graduate from high school on time (in eight semesters) with your incoming ninth grade class, you may use **one** core course completed in the year after graduation (summer or academic year) prior to full-time collegiate enrollment. You may complete the core course at a location other than the high school from which you graduated and may initially enroll full time at a collegiate institution at any time after completion of the core course.

**For Division II, yes.** All core courses completed before your full-time enrollment at any college may be used by the NCAA Eligibility Center.

**For students with diagnosed disabilities.**

- **For Division I only**, beginning August 1, 2010, a student must graduate "on time" in order to use up to three (3) additional approved core courses taken before full-time enrollment in college.
- **For Division II only**, students may use any approved core courses taken before full-time enrollment in college.
- **For Divisions I and II**, students may use courses for students with education-impacting disabilities that are designated on the high school's list of NCAA courses.

For more information regarding education-impacting disabilities, see the Frequently Asked Questions on Students with Disabilities page located at [www.eligibilitycenter.org](http://www.eligibilitycenter.org), then click "**NCAA College-Bound Student-Athletes**" and then "**Resources**." It is located under the "**U.S. Students**" section.

***How does the NCAA treat courses similar in content?***

Some approved core courses might be considered duplicates. That is, the content of one course is the same as that of another, even though the classes might have different titles. If you have taken two classes considered to be duplicates, you will receive only one core-course credit (typically for the course with the higher grade). Please ask your high school counselor if you have questions about duplicate courses.

***May courses taken at high school "A" be accepted if they appear on high school "B's" transcript?***

No. High school "A" may provide the NCAA Eligibility Center with an official copy of high school "B's" transcript, but grades from one high school cannot be accepted on another high school's transcript.

***May a nonstandard ACT/SAT exam be used for initial eligibility?***

Yes. Students with diagnosed education-impacting disabilities may take a nonstandard ACT or SAT exam. The test score must be provided to the NCAA Eligibility Center from the testing agency, just as any other test score.

***How are students prioritized for processing at the NCAA Eligibility Center?***

Students who have their status requested by an NCAA college or university are prioritized by the NCAA Eligibility Center for processing. If a student's eligibility status is never requested by a college or university, the NCAA Eligibility Center may not process such a student's certification.

\*If you have additional questions or need further assistance, please contact the NCAA Customer Service Center at 877/262-1492.

## Home School Frequently Asked Questions

### ***What if I was home schooled for all or part of high school?***

Students who were home schooled for any part of high school (grades nine through 12) must now register with the NCAA Eligibility Center. The NCAA Eligibility Center will determine whether home schooled college-bound student-athletes will be eligible for practice, competition and institutional financial aid at an NCAA Division I or II college or university during their freshman year. The NCAA Eligibility Center will perform preliminary and final certification reports for home schooled students. The preliminary analysis of a student's academic record will enable the student to become aware of any deficiencies in their academic record and allow the student to rectify those deficiencies prior to high school graduation.

### ***When should I register with the NCAA Eligibility Center?***

College-bound student-athletes looking to attend an NCAA Division I or II college or university should register at the beginning of their junior year of high school.

### ***How do I register with the NCAA Eligibility Center?***

Home schooled students should register with the NCAA Eligibility Center online at [www.eligibilitycenter.org](http://www.eligibilitycenter.org).

### ***What documents are required?***

Please review and print the [Home School Checklist](#) to view a complete list of the required steps for home school college-bound student-athletes. Next, in order to evaluate your certification status for purposes of NCAA initial eligibility, please submit the following information to the NCAA Eligibility Center:

- Online registration with the NCAA Eligibility Center at [www.eligibilitycenter.org](http://www.eligibilitycenter.org).
- Fee payment.
- Standardized test score (ACT and/or SAT) must be submitted directly from the testing agency using code **9999** to select the NCAA Eligibility Center as a score recipient. Note that test scores received on a transcript cannot be used by the NCAA Eligibility Center. A Student Score Report or scores taken directly from a Student Score Report cannot be accepted by the NCAA Eligibility Center for initial-eligibility purposes.
- Home school transcript that includes: ([Transcript Example](#))
  - Course titles;
  - Course grades;
  - Units of credit for courses;
  - Grading scale (if numeric grading is used, alpha/letter equivalent grades are needed);
  - Signature of the home school administrator (the parent or other person who organized, taught and evaluated the home school coursework).

- Transcript from any other high school, college, and/or nontraditional program attended (mailed directly from the issuing institution).
- Proof of high school graduation, including specific graduation date (month/day/year).
- Evidence that home schooling was conducted in accordance with state laws (**a written statement from the home school administrator verifying compliance with state home school legislation**). Please attach any supporting documentation.
- A statement of who taught and evaluated the coursework, awarded grades and issued credit.
- List of textbooks used throughout home schooling [text titles, publisher or ISBN and in which specific course(s) used]. ([Textbook List Example](#))

If your home school coursework was taken through an established nontraditional program (e.g., correspondence, internet, tutoring, etc.) that evaluated your coursework and issues transcripts, please have that program provide a copy of your transcript and provide contact information so that the Eligibility Center can obtain further information, if necessary.

Also, if you were home schooled in New York, please note the NCAA Eligibility Center cannot accept "proof of graduation" from a diploma issued by a home school in New York, because the state of New York does not recognize diplomas that are issued by a home school. If a student is home schooled in New York and does not graduate from a high school, that student would have to provide a GED certificate in order to meet the NCAA's graduation requirement.

**The NCAA Eligibility Center will evaluate home school coursework only after all required documents have been received.** After this information is received, the NCAA Eligibility Center may need to request additional information or clarification before completing the certification.

Please direct all inquiries regarding this matter to home school evaluation at the NCAA Eligibility Center.

**HOME SCHOOL EVALUATION ADDRESS AND CONTACT INFORMATION:**

Address: NCAA Eligibility Center (ATTN: Home School Evaluation), 1802 Alonzo Watford Sr. Drive, Indianapolis, IN 46202-6222

**\*NOTE – DO NOT SEND HOME SCHOOL INFORMATION TO THE NCAA ELIGIBILITY CENTER P.O. BOX\***

Phone Number: 877/262-1492. Select option four (4) to be directed to the home school department.

***Some coaches who are recruiting me are afraid that I won't get approved as a qualifier. What can I do to assure them I am taking all the right courses?***

You will want to work with your parents or home school instructor to ensure that you are indeed taking the required number of core courses in the appropriate subject matters. You should provide the NCAA college or university a copy of your home school transcript and ACT/SAT scores.

***What courses may be used to meet the core-course requirements?***

In ***Division I***, generally only courses completed in grades nine through 12 (eight semesters) may be considered core courses. However, if the student has graduated on time after the eighth semester of high school, one core-course unit taken in summer school prior to initial full-time collegiate enrollment may be used to meet the core-course requirements. In ***Division II***, a student may use all core courses completed prior to initial, full-time collegiate enrollment (regardless of when he or she graduates) to meet the core-curriculum requirements. A college course taken during high school by a home schooled student may be used to meet the core-course requirement, provided: (1) the course is placed on the home high school transcript; (2) an official college transcript is received directly from the issuing institution; (3) the course would be accepted for any other student; and (4) the course meets all requirements to be considered a core course. For ***both Divisions***, courses completed during the eighth grade may also be used, provided they meet core-course requirements and are placed on the home school transcript with a grade and credit. [Note: Courses with credits awarded through credit-by-exam **will not be used** to meet core-course requirements.]

## **Students with Education-Impacting Disabilities Frequently Asked Questions**

### ***What is an Education-Impacting Disability?***

For academic eligibility purposes, the NCAA defines a disability as a current impairment that has a substantial educational impact on a student's academic performance and requires accommodation.

Some of the most common education-impacting disabilities seen in student-athletes include:

- Learning Disabilities/Disorder;
- ADHD;
- Mental Health Disorders;
- Medical Conditions;
- Deaf/Hard of Hearing; and
- Autism Spectrum Disorder.

### ***Where should I send my education-impacting disability documentation?***

**Education-Impacting Disability documentation should be sent to the following address with the cover sheet and Buckley statement (attached below):**

**NCAA EID Services  
P.O. Box 7110  
Indianapolis, IN 46207-7110**  
[EID Cover Sheet](#)  
[Buckley Statement](#)

### ***Do the standards for initial eligibility change for students with education-impacting disabilities?***

No. All students must satisfy the same standards in order to compete in NCAA Divisions I and II athletics.

### ***Will colleges or universities have access to my child's records?***

No. Information submitted to NCAA Education-Impacting Disability Services is not released to NCAA colleges or universities unless the student makes a specific written request to do so.

***What are the accommodations provided to students with education-impacting disabilities?***

**For Division I only**, a student must graduate "on time" (within eight semesters) in order to access the following accommodation:

- Use up to three (3) additional approved core courses taken before full-time enrollment in college.

**For Division II only**, a student may access the following accommodation:

- Use any approved core courses taken before full-time enrollment in college.

**For Divisions I and II, a student may access the following accommodations:**

- Use courses for students with education-impacting disabilities that are designated on the high school's List of NCAA Courses.
- May take a nonstandard test to satisfy test score requirements.

***Why would a student choose to file his or her education-impacting disability documentation with the NCAA?***

In order to access the accommodations listed above, the prospective student-athlete must submit his or her education-impacting disability documentation for review.

***When should a student submit his or her education-impacting disability documentation with the NCAA?***

Disability documentation needs to be submitted to the NCAA only if a student with an education-impacting disability would like to use core courses taken after high school graduation to satisfy Division I initial-eligibility requirements. The student should submit his or her disability documentation to NCAA Education-Impacting Disability Services and include the following information:

1. A signed copy of the most recent professional evaluation report diagnosing the student's education-impacting disability, including the diagnostic test results.
2. A copy of the student's most current Individual Education Plan (IEP), Individual Transition Plan (ITP), Section 504 Plan, or Summary of Performance (SOP). For private high schools, please provide a statement on the high school's letterhead describing the accommodations, if any, received by the student because of the education-impacting disability.
3. A copy of a signed statement (on letterhead) provided by a qualified professional indicating the student's current diagnosis and necessary treatment.
4. The student's NCAA Identification Number (NCAA ID), high school graduation year, permanent address and phone number should be included with the aforementioned documentation.
5. An individual (e.g., parent or guardian) who wishes to discuss a student-athlete's education-impacting disability services request must be listed on the Buckley Statement, a form which is signed by the student. This form should be included with the submission

of the aforementioned documentation (can be downloaded from the link at the top of the page).

***Is a course designated for education-impacting disability students ever acceptable for NCAA initial eligibility purposes?***

In order for courses designated for students with education-impacting disabilities to be approved, the course must be substantially comparable, qualitatively and quantitatively, as a regular core course offered in that academic area.

***Can a student with a diagnosed disability use courses that are designated for students with education-impacting disabilities to meet NCAA core-course requirements?***

Students who have submitted their disability documentation for review and who have been identified as having an education-impacting disability may use courses for students with education-impacting disabilities for the purpose of meeting NCAA core-course requirements. Courses for students with education-impacting disabilities must appear on the high school's list of NCAA courses in order for a student to receive NCAA credit for the course.

***What if a student with an education-impacting disability receives a final initial-eligibility decision that indicates the student is NOT CERTIFIED after he or she has received all of the education-impacting disability accommodations?***

The college or university where the student-athlete has been admitted may choose to file an initial-eligibility waiver on behalf of the student-athlete. All required waiver information must be submitted to the NCAA academic and membership affairs department. In considering a waiver of the initial-eligibility standards, the following may be considered:

1. Extent to which the student's failure to meet the initial-eligibility standards is attributable to an education-impacting disability;
2. Whether noncore courses taken by the student were specified in the student's Individualized Education Plan (IEP), satisfied graduation requirements and/or prepared the student to successfully complete a planned course of study at a particular college or university;
3. Student's overall academic record, including performance on standardized tests;
4. Assessments of high school personnel attesting to the likelihood of the student's academic success in college, while participating in athletics;
5. Accommodations for students with education-impacting disabilities available to and used by the student during high school;
6. Other factors useful in assessing the student's preparedness to succeed in college; and
7. Academic support plan.

***Are accommodations available for students with education-impacting disabilities once they enroll in a college or university?***

Many colleges or universities provide accommodations to students with education-impacting disabilities. However, it is the student's responsibility to approach the college and disclose his or her disability documentation.

***What is the purpose of the Buckley Statement?***

This form allows the student to identify and grant access for individuals to review the college-bound student-athlete's education-impacting disability information and/or speak on his or her behalf with the NCAA staff. *(This form can be downloaded by clicking the link at the top of this page.)*

***Are there other resources available to assist with the transition process from high school to college?***

Please refer to the following link for a copy of the letter provided to parents by the [U.S. Department of Education – Office of Civil Rights](#).

The NCAA discussed the non-medical use of ADHD medications and was reviewed at the [2012 NCAA Convention](#).

**\*It is important to note that NCAA academic requirements are the same for all students, including students with an education-impacting disability. Additionally, the information outlined above is for students who intend to enroll in an NCAA Division I or II college or university. Because NCAA regulations are subject to change, the NCAA encourages you to consider how delaying your enrollment may impact your eligibility.**
